# Why use Revolving Doors

A revolving door is always open and always closed

There is a revolving door for any kind of entrance

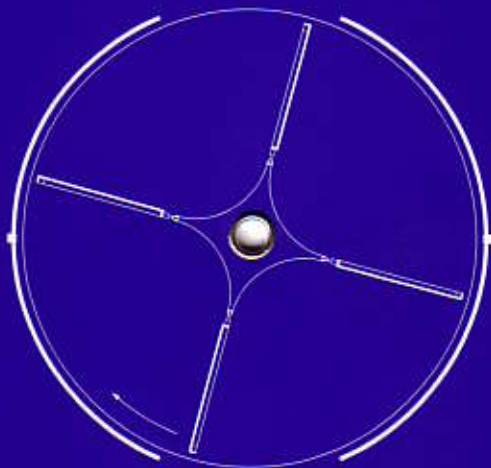

A revolving door invites people to enter a building

A revolving door can function as a security door when necessary

A revolving door keeps warm air inside and cold air outside (in case of lower temperatures outside)

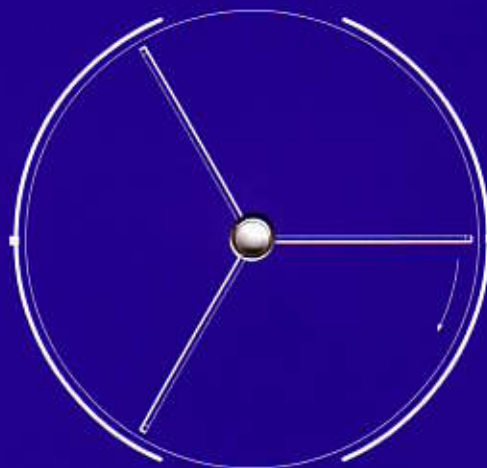

A revolving door keeps cold air inside and warm air outside

A revolving door offers a draught-free working environment for your staff

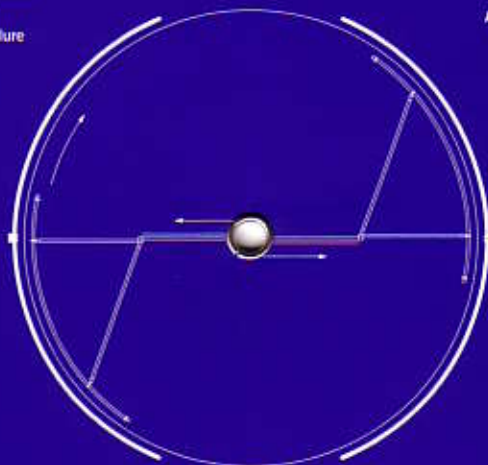

**TOURNEX** - "The solid body 3- or 4-wing"

Available up to a diameter of 6 m for high capacity needs  
Elegant rotating showcase in centre column  
High level of comfort in segments  
Can be used as a manual door in case of power failure

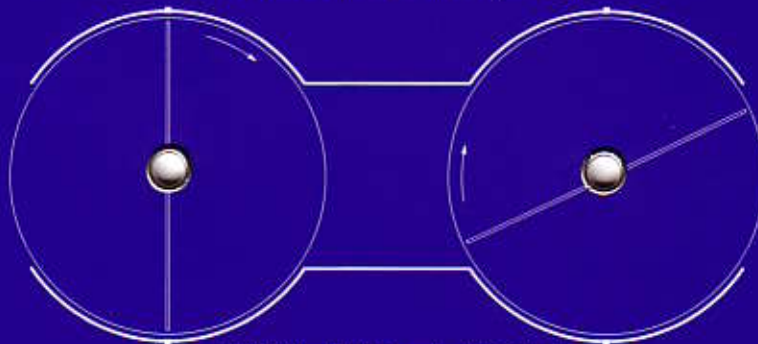

**TOURNIKET** - "The flexible all-wing"

Most affordable revolving door  
Flexible design  
Available in small diameters for renovation projects

**DUOTOUR** - "The spacious 2-wing"

Two door types combined in one (revolving- and sliding door)  
Possibility of switching to sliding door mode when a large flow of people is expected  
Sliding door will remain open in case of emergency  
Two elegant rotating showcases at end of door wings  
Large segments (180) easily suitable for trolleys and wheelchairs  
Door can be used as a manual door in case of power-failure

**TWINTOUR** - "The high capacity double 2-wing"

Highest capacity of all revolving doors in relation to diameter  
Most economical door in terms of energy it consumes and energy it saves  
Automatic panic escape - no human interference  
Large segments (180) and big day opening (90),  
Suitable for trolleys and wheelchairs (combines advantages of both 3- and 4-wing)
